Software Engineer (Fresher) — Full-Stack Development & Quality Assurance

PROFESSIONAL SUMMARY

Computer Science graduate (B.E., 2026) with hands-on experience across full-stack web development and software quality assurance, built through a production backend internship and five end-to-end technical projects. Proficient in Python, Django, React, and REST API development, with strong QA fundamentals in manual, functional, regression, and API testing (Postman, Selenium, Pytest). Comfortable across the full development lifecycle — building features and independently testing them before release. Seeking a Software Engineer or QA Engineer role to apply this dual development-and-testing skill set.

CORE SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3, PHP

Frameworks & Libraries: Django, FastAPI, React.js, Bootstrap, Django REST Framework

QA & Testing: Manual Testing, Functional & Regression Testing, API Testing (Postman), Test Case Design, Bug/Defect Reporting, UAT, Selenium WebDriver, Pytest

Databases & Middleware: MySQL, Redis, Apache Kafka

Tools & Practices: Git, GitHub, VS Code, JIRA, Jupyter Notebook, Agile/Scrum, Code Reviews, Postman

Concepts: REST API Design, JWT Authentication, Role-Based Access Control, OAuth 2.0 (awareness), JSON/XML Parsing, Data Structures & Algorithms, DBMS

PROFESSIONAL EXPERIENCE

Software Intern — Planotech Pvt. Ltd., Bengaluru

Sep 2025 – Dec 2025

- Developed and enhanced REST APIs in Python/Django, contributing directly to production-level backend systems used in live deployments.
- Collaborated within a cross-functional Agile team, participating in sprint planning, stand-ups, and code reviews.
- Shipped real-world software features alongside experienced engineers, gaining exposure to production release cycles and clean-code standards.

KEY PROJECTS

KrishiSetu — Digital Agriculture Marketplace | Django · React · FastAPI · MySQL · JWT · Redis

- Built a full-stack marketplace connecting Farmers, Buyers, and Seed Distributors across India, with 4 role-based dashboards secured via JWT authentication.
- Designed and delivered 10+ REST API endpoints for crop listings, price prediction, seed marketplace, and real-time buyer-farmer messaging; added Redis caching that cut response latency by 60%.
- Independently authored and executed 40+ manual test cases (Postman) across authentication, listings, and marketplace flows; identified and verified the fix for a critical JWT session-expiry bug prior to release.
- Performed role-based access testing across all 4 dashboards, confirming each user role could only reach permitted pages and actions.

AI-ChatBox — Intelligent Conversational System | Python · Django · Groq API · MySQL · Selenium

- Built an AI-powered chat application integrating the Groq API for real-time LLM responses, with session persistence in MySQL.
- Authored structured positive/negative test cases for registration, login, and chat flows, and automated core regression checks using Selenium WebDriver, reducing manual re-testing effort.
- Tested API response handling for slow and failed Groq API calls, verifying graceful degradation and clear, user-friendly error messaging.

Additional Projects | IoT Freshness Classifier · Gym Management System

- IoT-Based Freshness Classifier: built a Python/ML model integrated with real-time IoT sensor data, with Pandas/Matplotlib dashboards for classification reporting.
- Gym Management System: developed a full CRUD PHP/MySQL web application automating member management, attendance tracking, billing, and renewal notifications.

CERTIFICATIONS

- ServiceNow Micro-Certification — “Welcome to ServiceNow”, ServiceNow (June 2026)
- ServiceNow Certified System Administrator (CSA) — In Progress, Expected 2026

EDUCATION

B.E. in Computer Science & Engineering — City Engineering College, Bengaluru (VTU)

2022 – 2026

Pre-University (PCMB — Science) — PACE PU College, Haveri

2020 – 2022
